For that, you'll receive a competitive remuneration package and the opportunity to pursue your international career path.

Company Profile

SINOPEC International Petroleum Exploration and Production Corporation (SIPC) is a wholly-owned subsidiary of SINOPEC Group, specializing in overseas oil and gas exploration and production investment and operation. Since its inception in 2001, SIPC, committed to its core values of "Responsibility, Integrity, Shared Values, and Enterprising", has formed good relationship with host countries and partners, and created win-win for all stakeholders on the back of SINOPEC's advantages as an integrated oil company. It has built a presence in 26 countries, participating in 50 exploration or production projects. Remarkable achievements were achieved on the front of international operation, management, and cross-cultural integration. Looking to the future, SIPC will continue to work more closely and flexibly with the industry, the government, and the finance community to create benefits for all and diversify the company's energy and resource portfolio. The vision of SIPC is to build a world-leading oil company featuring excellence and harmony, and achieving that vision will contribute greatly to the SINOPEC's goal of building itself into a world leading energy and chemical corporation.

China Petrochemical Corporation (SINOPEC), as the parent company of SIPC, is a super-large petroleum and petrochemical group and ranks top 4 in The Fortune 2016 Global 500.

Work Location: Beijing, China

Primary Purpose of Position

Responsible for preparing oil and gas field development, reviewing projects, and strengthening the company's unconventional oil and gas development and production management system.

Responsibilities
