- Optimizing and troubleshooting plant, field, and gathering systems
- Tests and monitors gas and oil wells using correct procedures
- Conducting daily, weekly and monthly plant / field checks
- Input accurate production information into field data capture system and verify inputs (PVR)
- Monitor equipment and ensure maintenance frequencies are complied with
- Working with pump jacks, associated compressors, testing facilities, and batteries
- Maximize production and ensure reliability of producing wells, performing tests as required
- Support MOC process on projects
- Work on a rotational shift and able to take call outs
- Control process start-up, shut down and troubleshooting
- Adjust valves, pumps, controls and process equipment
- Identify equipment failures and take corrective action to restore operations
- Record required data from meter and instrumentation
- Monitor equipment and identify maintenance requirements
- Take a lead role in promoting safe work practices and follow Health, Safety & Environment policies and procedures
- Complete core safety training requirements and completion of site-specific safety competencies
- Act as the backup safety or rescue person, when required
- Maintain complete and accurate logs for the use of company vehicles
- Documentation as necessary to manage the safety, OPEX, and compliance duties associated with the position;
- Code invoices
- Work closely with Lead Operator, assisting with the coordination of projects and resolving concerns.

Position Knowledge, Skills and Experience

- Experience working with new well start-ups, downhole / completions, process troubleshooting, and well optimizing is preferred
- Mechanically inclined with a safety mindset
- Strong understanding of regulatory requirements and commitment to adhere to work safe policies and procedures
- Experience using Microsoft Office as well as PVR

- Knowledge of SCADA systems would be an asset
- Willingness to support the reporting documentation requirements necessary to manage the safety, OPEX, and compliance duties associated with the position
- Possess strong communication skills with internal and external stakeholders, but also have the autonomy to work independently
- Detail-oriented, strong organizational skills, and able to establish goals and objectives within designated time frames
- Ability to problem solve and effectively identify issues to develop and implement solutions for resolution
- Ability to work independently, as well as demonstrated ability to work well in a team, having a solution-focused mindset with strong collaboration and communication skills
- Display a high-level of integrity in all actions, complying with and promoting the company's core values, a respectful work environment, and aligning with the code of business conduct
- Demonstrated ability to understand and operate effectively in a diverse and multi-cultural environment

Qualifications

- High school diploma
- 5-8 years of experience in a sour/sweet plant/field experience is required. Sour gas experience preferred.
- Class 5-GDL license with a clean driving record
- Up to date certification in Transportation of Dangerous Goods (TDG), H2S, WHMIS, First Aid and other applicable safety tickets.
